

FOR IMMEDIATE RELEASE

Michetti Information Solutions, Inc. Announces Acquisition of eQx Systems

Edmonton, AB – December 29, 2024 – Michetti Information Solutions, Inc. (MIS), a leading system integration firm based in Alberta is pleased to announce the acquisition of eQx Systems, another software development firm based in Edmonton. This strategic move marks a significant milestone in MIS's growth and expansion strategy in legal software currently used by Canadian law firms.

"We are thrilled to welcome eQx Systems into the MIS family," said Gregory Michetti, President of Michetti Information Solutions, Inc. "This merger will allow us to leverage eQx Systems' expertise and resources to provide even greater value to our clients and our legal software stack."

The acquisition of eQx Systems enhance MIS's capabilities in software development and cloud services, further solidifying its position as a market leader in the legal technology sector. MIS has a well-established reputation for reinventing systems currently running older technology methods and adding modern, cloud-based techniques and platform. Both firms began operations over 25 years ago.

The combined entity will operate under the Michetti Information Solutions, Inc. brand and will continue to serve clients from both companies. This includes MIS's deep and experienced understanding of the full .NET stack, database design & management, user interface creation, real-time search & reporting, firewall networking, identity, cloud and SaaS apps along with eQx Systems Oracle security platform, unified endpoint management, and data protection solutions. As IT security becomes more critical, and threats continue to escalate, it's more important than ever to have bullet proof applications across management and security.

While commerce in Alberta is driven by the oil and gas sectors, recent advancements in high tech by provincial companies has been strong.

"When software is used nationally but operated under provincial jurisdiction, Alberta is by far the best place in Canada for a head office. In my opinion, nothing better describes "**The Alberta Advantage**" than this acquisition," adds Michetti.

The acquisition is expected to be completed in Q1 2025, with integration efforts nearly complete. Clients of both companies can expect a seamless transition and continued high-quality service.
